All title and intellectual property rights in and to the content that may be accessed through use of the SOFTWARE PRODUCT is the property of the respective content owner and may be protected by applicable copyright or other intellectual property laws and treaties. This Software License Agreement grants you no rights to use such content. If this SOFTWARE PRODUCT contains documentation that is provided only in electronic form, you may print one copy of such electronic documentation. You may not copy the printed materials accompanying the SOFTWARE PRODUCT.

BACKUP COPIES: After installation of one copy of the SOFTWARE PRODUCT pursuant to this Software License Agreement, you may make one copy of the SOFTWARE PRODUCT solely for backup or

archival purposes. Except as expressly provided in this Software License Agreement, you may not otherwise make copies of the SOFTWARE PRODUCT or the printed materials accompanying the SOFTWARE PRODUCT.

U.S. GOVERNMENT RESTRICTED RIGHTS: All SOFTWARE PRODUCT provided to the U.S. Government pursuant to solicitations issued on or after December 1, 1995 is provided with the commercial rights and restrictions described elsewhere

herein. All SOFTWARE PRODUCT provided to the U.S. Government pursuant to solicitations issued prior to December 1, 1995 is provided with RESTRICTED RIGHTS as provided for in FAR, 48 CFR 52.227-14 (JUNE 1987) or FAR, 48 CFR 252.227-7013 (OCT 1988), as applicable.

LIMITED WARRANTY FOR SOFTWARE PRODUCTS ACQUIRED IN THE U.S. AND CANADA:

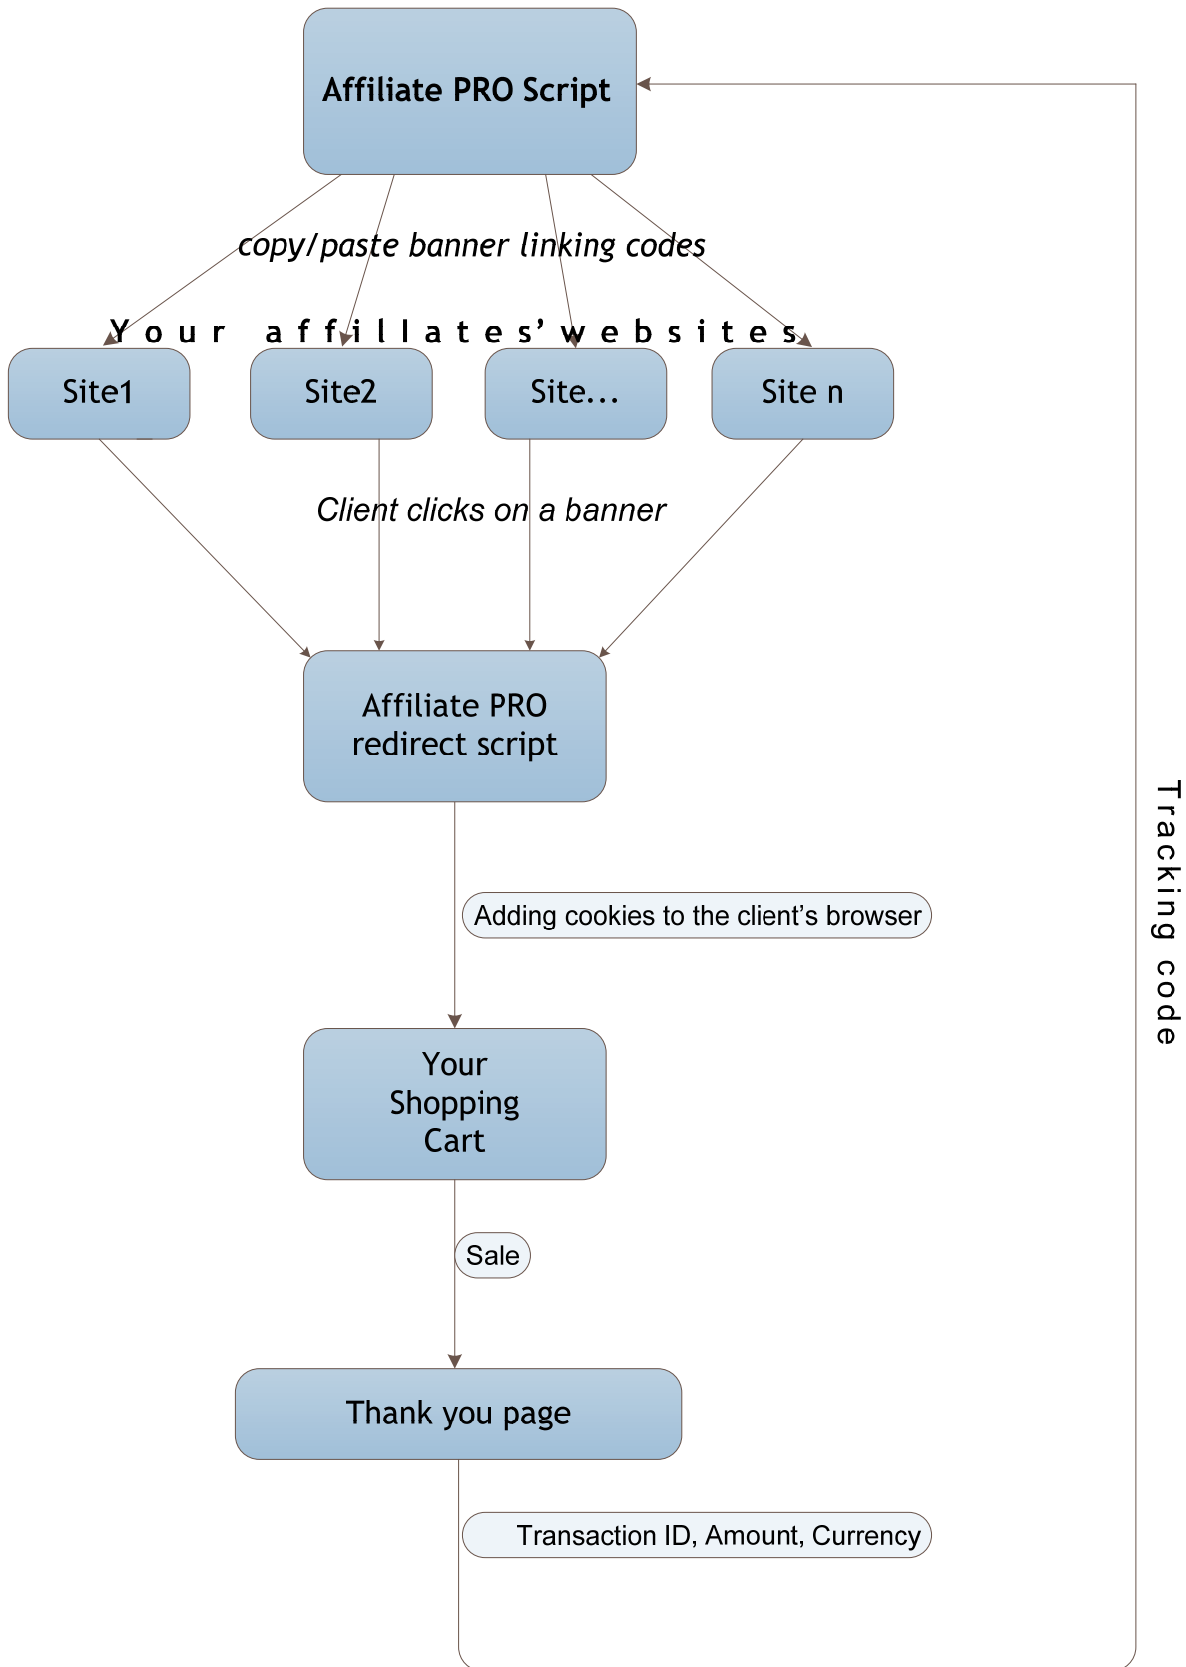

SoftService warrants that (a) SoftService's support engineers will make commercially reasonable efforts to solve any problem issues. Some states and jurisdictions do not allow limitations on duration of an implied warranty, so the above limitation may not apply to you.

CUSTOMER REMEDIES: This Limited Warranty is void if failure of the SOFTWARE PRODUCT has resulted from accident, abuse, or misapplication.

NO OTHER WARRANTIES. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, SoftService AND ITS SUPPLIERS DISCLAIM ALL OTHER WARRANTIES AND CONDITIONS, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT, WITH REGARD TO THE SOFTWARE PRODUCT, AND THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT SERVICES. THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY HAVE OTHERS, WHICH VARY FROM STATE/JURISDICTION TO STATE/JURISDICTION.

LIMITATION OF LIABILITY: To the maximum extent permitted by applicable law, in no event shall SoftService or its suppliers be liable for any special, incidental, indirect, or consequential damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use the SOFTWARE PRODUCT or the provision of or failure to provide Support Services, even if SoftService has been advised of the possibility of such damages. If you have entered into a SoftService Support Services Agreement, SoftService's entire liability regarding Support Services shall be governed by the terms of that agreement. Because some states and jurisdictions do not allow the exclusion or limitation of liability, the above limitation may not apply to you.

Description of what is Affiliate PRO Script?

You create product groups and set up the commissions for the 5 level of affiliates. See page 26

Then you create banners for the product groups. See page 28

Your affiliates register in your system and take banner linking code, then they paste it to their sites. See page 41

When a client clicks on one of these banners, he gets to your website and makes a transaction (sale, recurring sale, or you pay per click)

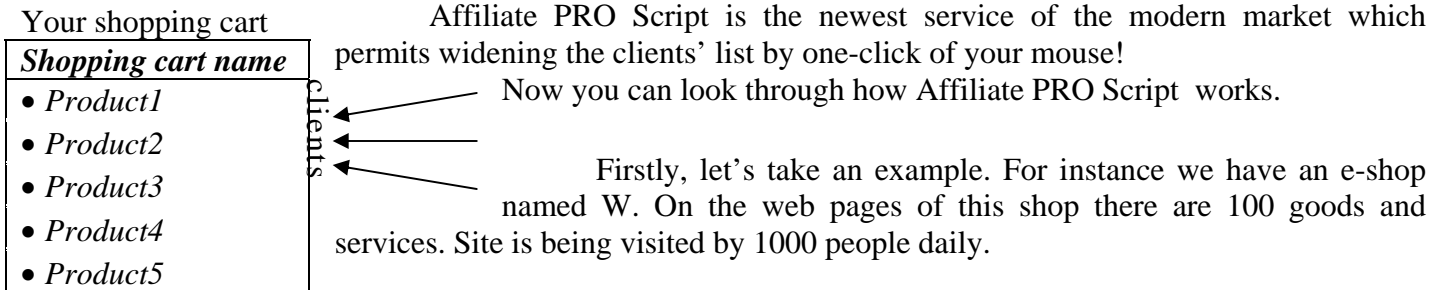

When a client does a successful buying, he is redirected to your website ThankYou Page where transaction ID, amount, currency etc is mentioned.

The affiliate script tracks the transaction and gives the necessary commissions top your affiliates.

<http://www.affiliateproscript.com/doc/>

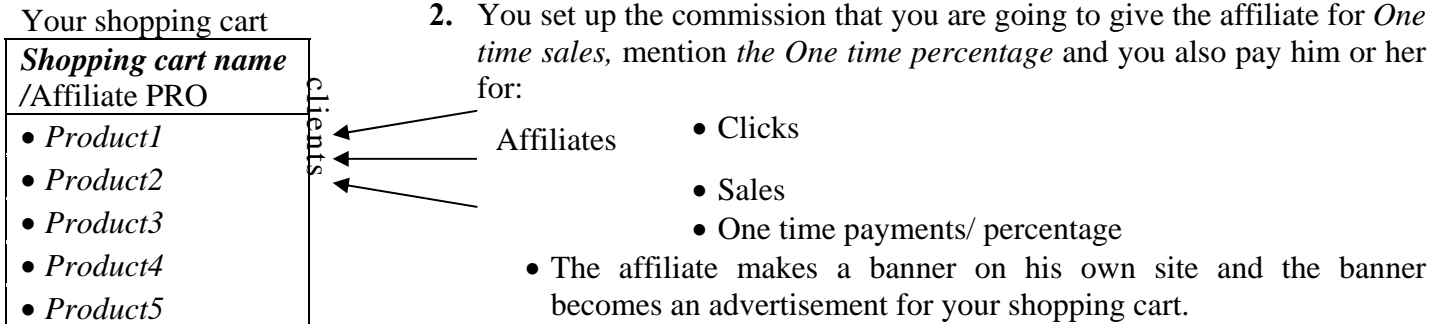

Affiliate PRO Script is an auxiliary resource for your site which helps you widening your client list without exerting any efforts.

Nowadays, advertising which is the engine of the trade became expensive, that's why each shopping cart's owner can not afford as much as needed.

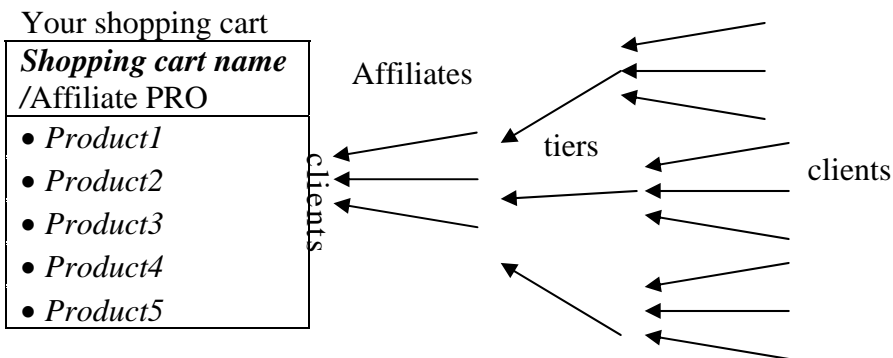

Buying Affiliate PRO Script, you install it to your cybermall. After doing that, you attract the attention of the affiliates to the site (spam, forums, advertising etc.), where they register and... begin widening your clients' list! Four simple steps of "how does it happen?"

1. An affiliate registers on the site;

3. Clients visit your site through the link on your affiliate's site. Against the quantity of the affiliates, your client's base widens and you are giving the mentioned percent to your affiliates. Eventually everyone is happy!

You are setting the percentage and the level of the affiliates by yourself.

If you still have problems or questions that were unsolved and unanswered in this guide, feel free to write us at: support@affiliateproscript.com

Step-by-step installation

After buying Affiliate PRO Script you get the archive like affiliate_proX.X.X.zip (where X.X.X is the version number). Example: affiliate_pro3.2.8.zip

System Requirements

- **Linux or Windows server.**
- **Web Server running PHP 4.3.x or 5.x.**
- **MySQL database 3.x, 4.x or 5.x (recommended 4.1.x or later version)**

For using Affiliate PRO Script do the following:

- Check if your MySQL account information granted access to create database. Installation wizard will check database name specified in parameters and if such database not exist in MySQL it will try to create it. If your MySQL account doesn't have necessary privileges to create database then just create it yourself using control panel or shell access and specify in parameters to installation wizard.
- Unzip and Upload all files of this archive into your website using FTP or other methods
- Go to web folder of your affiliate program with web browser. It will automatically start installation wizard and guide through affiliate program setup process.

This archive must be unpacked to the local directory on your local PC. Everything that was unpacked must be copied to your server to the installation folder:

Usually FTP (file transfer protocol) is used or some other ftp client (like SmartFTP Client).

After doing that, you should go to this folder through <http://> (using your browser). Example:
http://your_server_addr.com/affiliatepro/ (if the folder for installation on the server was affiliatepro).

AffiliatePro - Installation

- Step 1: Create Database
- Step 2: Primary Admin Setup
- Step 3: Site Setup

Enter your database information:

Database Host:

Database Username:

Password:

Database Name:

NOTE: You can create database manually or let the script create database. If you want script to create database make sure that given account has enough privileges to do that.

Set write permissions on folders:

1. banners/img
2. banners/swf
3. backups
4. documents
5. config
6. log
7. resource

You can do that by using `chmod` command from terminal or FTP client.

The Script will automatically open the installation page:

Example: _addr.com/affiliatepro/install/install.php"

http://your_server_addr.com/affiliatepro/install/install.php

Here you should fill in your MySQL data.

Set write permissions using your ftp program (`chmod -R 777`) to the folders indicated.

After you gave permission, *correctly* filled in MySQL data (**NOTE: Database must be done in the UTF-8 code for the correct work multilanguage support**).

Administrator's panel description

In this page you can see the logotype Affiliate PRO Script which can be replaced by yours and the language panel where you may choose the language you need. On this panel you may see 17 languages, which are the most popular in the world. They are: English, German, French, Spanish, Italian, Portuguese, Dutch, Japanese, Korean, Chinese, Russian, Romanian, Greek, Turkish, Thai, Hebrew and Arabic).

Then you may see the main inlays on the webpage: Affiliates profiles, «Sales Activity», 'Statistics', 'Products' groups', 'Banners and Ads', 'E-mails', 'System Setup', 'Translation', 'Help', 'Customization'.

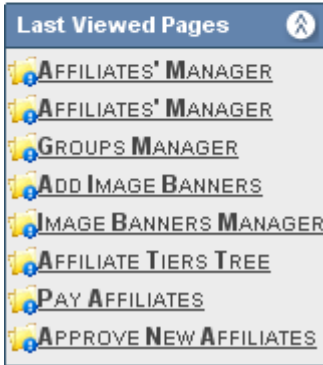

In the left you can see the additional links; 'To Do List', and 'Last Viewed Pages'.

The middle of the start page looks like a welcome menu. However in further usage it will start from the page 'Affiliate profiles' where you will see the table with your webmasters' data.

You can print the page or export the data to CSV.

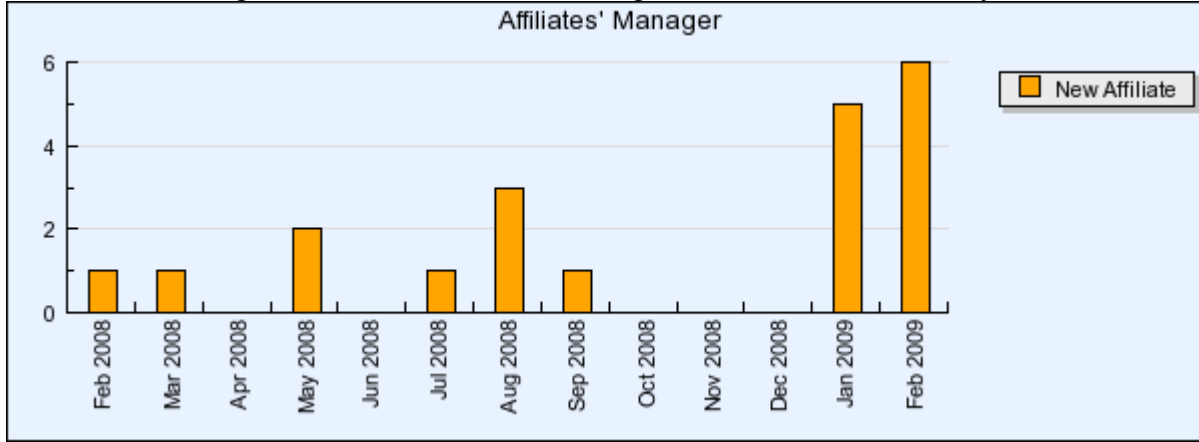

Now let's see each inlay in details.

I Affiliate profiles

1.1 Affiliates' Manager shows the diagram of the affiliates' activity.

Under the diagram there is the list of the registered affiliates. You may click on it to look through,

edit or delete the profile.

Moreover you may see the Excel button and if you click on in you will get the export to CSV. If you

1.3 In the inlay Pay affiliates you can set up the minimum sum to avoid the overhead charges. When you have affiliates need to be paid you will get the table with the affiliates IDs in there.

Pushing the button *Change*, the system sends you to the System Setup where the necessary field is in the red square. Then you need to push the *Update Configuration*.

Automatically Approve New Affiliates Profiles 

Auto Approve New Transaction 

Transactions Delay (minutes): 

Initial Account Balance: 

Payout Balance Required: 

Remember, that the script itself does not pay anyone. You do it yourself and this feature helps you optimizing the process.

1.4 Affiliate tiers tree shows how many partners did each affiliate brought to the site. Each affiliate gets percentage from each partner he or she brings.

Affiliate tier trees are unlimited. In the *system config* you can adjust the depth commissions.

The max depth of affiliates' tiers' commissions is 9 but the depth itself is unlimited. It means the following: If an affiliate registers and he is called A. A invites B, B invites C, C invites E and E invites F. Then if you set there '2' the order will be the following: when F gets \$10, E will get 10% from \$10 and C will get 10% from 1\$ (because E got \$1=10% from \$10) and no one else gets the commission. However if you set '9' then B and A will also get their commission which will be extremely small.

Besides, if clicking on the name of the tier affiliate, you can look through his or her profile.

AFFILIATE PROFILES: AFFILIATE TIERS TREE

1.5 Adding manual sales

If you would like to add sales manually, go to the *Affiliate Profiles*. Then to *Affiliate Manager* and you will see there the diagram and the table. In the table click on the name of an affiliate and you will see the affiliate's profile and in the right corner of the frame displayed you will see little icons of a **green plus**, a

pencil and a printer.   

If you click on the image of the green plus you will see the following picture:

AFFILIATE PROFILES: SALES ADD MANUAL

IV Product groups or your first steps in Affiliate PRO

There are only two inlays: *Group manager* and *Add products group*.

In order to create new products group click on 'Add products group' and you will see the following page:

Product Group Name:	<input type="text" value="New Product"/>				
Traffic Page:	<input type="text" value="http://"/>				
Payout Settings:					
Level	Per Click	Per Sale	Per Sale Percentage	One Time	One Time Percentage

		<input type="button" value="Cancel"/>	<input type="button" value="Add Products Group"/>		

**The figures '25' are given by default as an example. You can easily erase it if necessary.*

First, set Product Group name and the URL of this product group. Then start setting commissions for different levels of affiliates.

There are 5 levels in the system. All affiliates after the registration get the 1st level by default. You can change affiliates' levels in the way you wish.

Let's see the detailed example:

You have 25 affiliates.

Five of them bring you low profit but many people come from their pages. You can leave them on the *level 1*.

Another five affiliates bring you not bad profit but customers who come from their pages make small payments. You can move them to the *level 2*.

Next five affiliates bring you good customers, who buy rather expensive products. To *level 3*.

Other five affiliates brings you customers who always make payments and each customer who came from that affiliates' page made a buying. They can be moved to *level 4*

The last 5 affiliates can be your fellows or people whom you probably know in person and want them to get the highest profit. Perhaps those affiliates are not your friends but just good webmasters who bring profitable customers. They can get *level 5* and the biggest commission.

Level	Per Click	Per Sale	Per Sale Percentage	One Time	One Time Percentage
1.	<input type="text" value="0.10"/> \$	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> %	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> %
2.	<input type="text" value="0.01"/> \$	<input type="text" value="5.00"/> \$	<input type="text" value="0.00"/> %	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> %
3.	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> \$	<input type="text" value="10.00"/> %	<input type="text" value="10.00"/> \$	<input type="text" value="0.00"/> %
4.	<input type="text" value="1.00"/> \$	<input type="text" value="0.00"/> \$	<input type="text" value="25.00"/> %	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> %
5.	<input type="text" value="0.00"/> \$	<input type="text" value="0.00"/> \$	<input type="text" value="30.00"/> %	<input type="text" value="5.00"/> \$	<input type="text" value="10.00"/> %

You may also do create 5 levels commission and make only one level, or two. It's up to you.

Besides, sometimes unnecessary to create many products groups and if convenient, you may create only one group with all the products in it. Or create an individual group for each product.

After creating the group, do not forget to push the *Add Products Group* button and you will be redirected to the page where all your products groups are listed (*Group manager*).

Product Group Name:	Test Product22			<input type="button" value="Edit Group"/>	<input type="button" value="Delete"/>
Product Group ID:	1				
Traffic Page:	http://www.affiliateproscript.com				
First Level Payouts:		Per Click	\$0.00		
Per Sale	\$0.00	One Time	\$0.00		
Per Sale Percentage	25.00%	One Time Percentage	0.00%		
Total Banners:	2	Total Text Ads:	0		

Product Group Name	indicates the name of the product group
Product Group ID	indicates the identification number of the product group
Traffic Page	indicates where a user will be directed when clicking on the link
First Level Payouts	shows the settings of the commission payout for level 1 (after the registration the affiliate gets level 1 by default)
Total Banners	shows the total number of banners for this product group

Also in this inlay product groups may be edited and deleted. Pushing the button *edit* you see the window *Payout settings* again and edit it is you need. .

If you deleted a group and need restoring, there is a system of backups. (see VII System Setup).

V Banners and Ads

Before creating a banner or a text advertisement you should create product group.

You can create three kinds of advertisement: image banner (static), flash banner (simply animated), and text advertisement.

After creating your products groups go to **Banners and Ads** and click on ‘Add image banner’ or other kinds (depends on your needs).

When you click on ‘add image banner’ you will see the following picture:

Products Group:
 

Banner Upload:

Or you can specify the entire one **Banner URL:**

Banner Description (optional):

(Example: Our most popular banner.)

- Banners must be .gif or .jpg and must not be larger than 500 Kb.
- The maximum file size can be changed [here](#)
- Processing May Take A Few Seconds

First, choose the product group, then upload the image or specify the URL. Then you can write the description for the banner if necessary.

The notification box on the right was made for your convenience.

*Flash banners can be created by following the same requirements as for image banners.

If you wish to create a text advertisement, the click ‘Add text adv’ and you will see the following page:

Products Group:
 

Text Ad Title:

Text Ad Content:

Using the provided linking code, affiliates can adjust the color scheme, height and width of their Text Ad to easily integrate with their site!

Don’t forget to set the title because it’s the most important point is the text adv.

On the page of creating a text adv you may see the sample of how the text advertisement will look like when you finish.

Banners are the most important part of creating your affiliate network.

Sample Product Title

www.affiliate.com

Your text ad content will go here. This is where you'll put information about your company or individual product if you're using product groups. Do not enter the URL.

VI E-mails

When an affiliate registers, administrator and the affiliate get special messages. It's *Templates* may be changed. Also you may send a message by visiting the inlay *Send e-mail*. In the *Templates* there are models

 -- Styles -- -- Format -- -- Font family -- -- Font size --

Path:

Also there is a small field where you can choose whom are you going to send the letters.

Send To:
All Affiliates

The next item 'Email settings' allows you to adjust all the settings for sending e-mails. First field is devoted to method, path of sendmail for e-mails and additional parameters.

Method:	Mail From PHP	
Path to sendmail program:	/usr/bin/sendmail	
Additional parameters:	-i	

The second field is devoted to SMTP settings: Host, port and other parameters should be set up by administrator. Don't forget to push *Update configuration* button.

Host:	localhost	
Port:	25	
Use SMTP Authentication:	No	
Username for SMTP auth.:	admin	
Password for SMTP auth.:	•••••

VII System Setup

7.1 Site configuration

Name of Company/Website:	AffiliatePro v3.2
Administrative Email:	support@affiliateproscript.com
Default Language:	English
Default Currency:	\$ - USD
Default Country:	United States
Verification image code:	On

This item can help you running your copy of Affiliate PRO.

First is site parameters which include name of the website, primary e-mail, default language (English set by default but can be easily changed), default currency, country and whether you need verification image code or not during the registration.

Next is setting up maximum banner upload size and the encoding for text advertisements.

Max. Banner Upload Size:	500 Kb
Use additional encodings for text ads:	<input type="checkbox"/> <input type="button" value="Modify"/>
	7bit, 8bit, ASCII, BASE64, BIG-5, ISO-8859-2, UTF-8, Windows-1250, Windows-1251, Windows-1252, Windows-1253, Windows-1254, Windows-1255, Windows-1256, Windows-1257, Windows-1258

Automatically Approve New Affiliates Profiles	Yes
Auto Approve New Transaction	No
Transactions Delay (minutes):	0
Initial Account Balance:	0.00
Payout Balance Required:	50.00

You can set up auto or manual approve of newly registered affiliates. Also the approve of transaction, delays between them and the initial bonuses. Also do not forget to set up the payout balance or your affiliates will demand for payouts everyday.

Enable Second Tier Sales	Yes
Affiliate tiers reference limitation:	0
Tiers Deep limitation:	2
Tier Payout Percentage:	10%

The system has an unlimited width and depth of tiers. However the 1st is the width of affiliates. If '0' it means 'unlimited', and you can limit it by yourself if you wish. The second is the depth of affiliates' tiers' commissions. The max is 9 but the depth itself is unlimited. It means the following:

If A affiliate registers and invites B, B invites C, C invites E and E invites F. Then if you fill there '2' the order will be the following: when F gets \$10, E will get 10% from \$10 and C will get 10% from 1\$ (because E got \$1=10% from \$10) and no one else gets the

commission. However if you fill '9' then B and A will also get their commission which will be extremely small. We can't check the depth of tier commissions deeper than 9.

*10% amount can be easily changed to suitable in the field '**Tier Payout Percentage**'.

The next is **currency config** and exchange rates. Exchange Rates data is provided by <http://www.yahoo.com>

Enable	ISO Code	Currency Symbol	Exchange Rate	Currency	Entity

4.3 Affiliate tiers tree

You may see your tiers tree here and if you click on the name of a tier affiliate you will see his profile.

The width and the depth of affiliate trees is unlimited. However the system tracks only 9 webmasters deep and no more.

Update

First of all the difference between the versions is not actually exist. It better not to update because it takes the structures of the database.

If you still want to update there are several ways:

1. You can do it yourself by the following instructions:
 - Back up all the files of affiliate PRO which you have on your server
 - Make back up of the MySQL database which is used for affiliate PRO
 - Rewrite all the files from the new version of the Affiliate PRO (see attachment)
 - Go to the admin panel under your name. If there are no errors, so the update was mostly successful.
 - If the page is not shown, or there are errors, return back the files and databases (in the order only)
2. There is another variant: you may pay us \$40 and our developer will provide the update by himself.

We DO NOT notify about updates. We publish this information here:

<http://www.softservice.org/support/viewtopic.php?f=6&t=128&start=0>

Also you can get the update information by writing us at support@affiliateproscript.com

Remember that we provide one license for one server.

If you have any demands about it, write as at support@affiliateproscript.com

ALSO:

If you get the following error while activating a copy of Affiliate PRO:

“Please contact support@affiliateproscript.com with your original order ID to recover your Customer ID”

Please do following:

Login to activation server: <http://www.softservice.org/activation/login.php>

(use password reminder if you forgot password)

Delete previous activation (click on delete link)

After that previous installation will not work and you can use the same Customer ID (if you forgot your Customer ID you can find it after login into activation server as well) to activate it on the new server.

AND:

If you have any tech issues, please send us the following info:

- detailed description of your problem
- your http access with your password
- your FTP access with full rights and password
- your customer ID

We hope you will easily run Affiliate PRO Script. If you have questions and recommendations, we will be glad to get it on support@affiliateproscript.com

Thank you
